

# ARENA CREEK WATERSHED

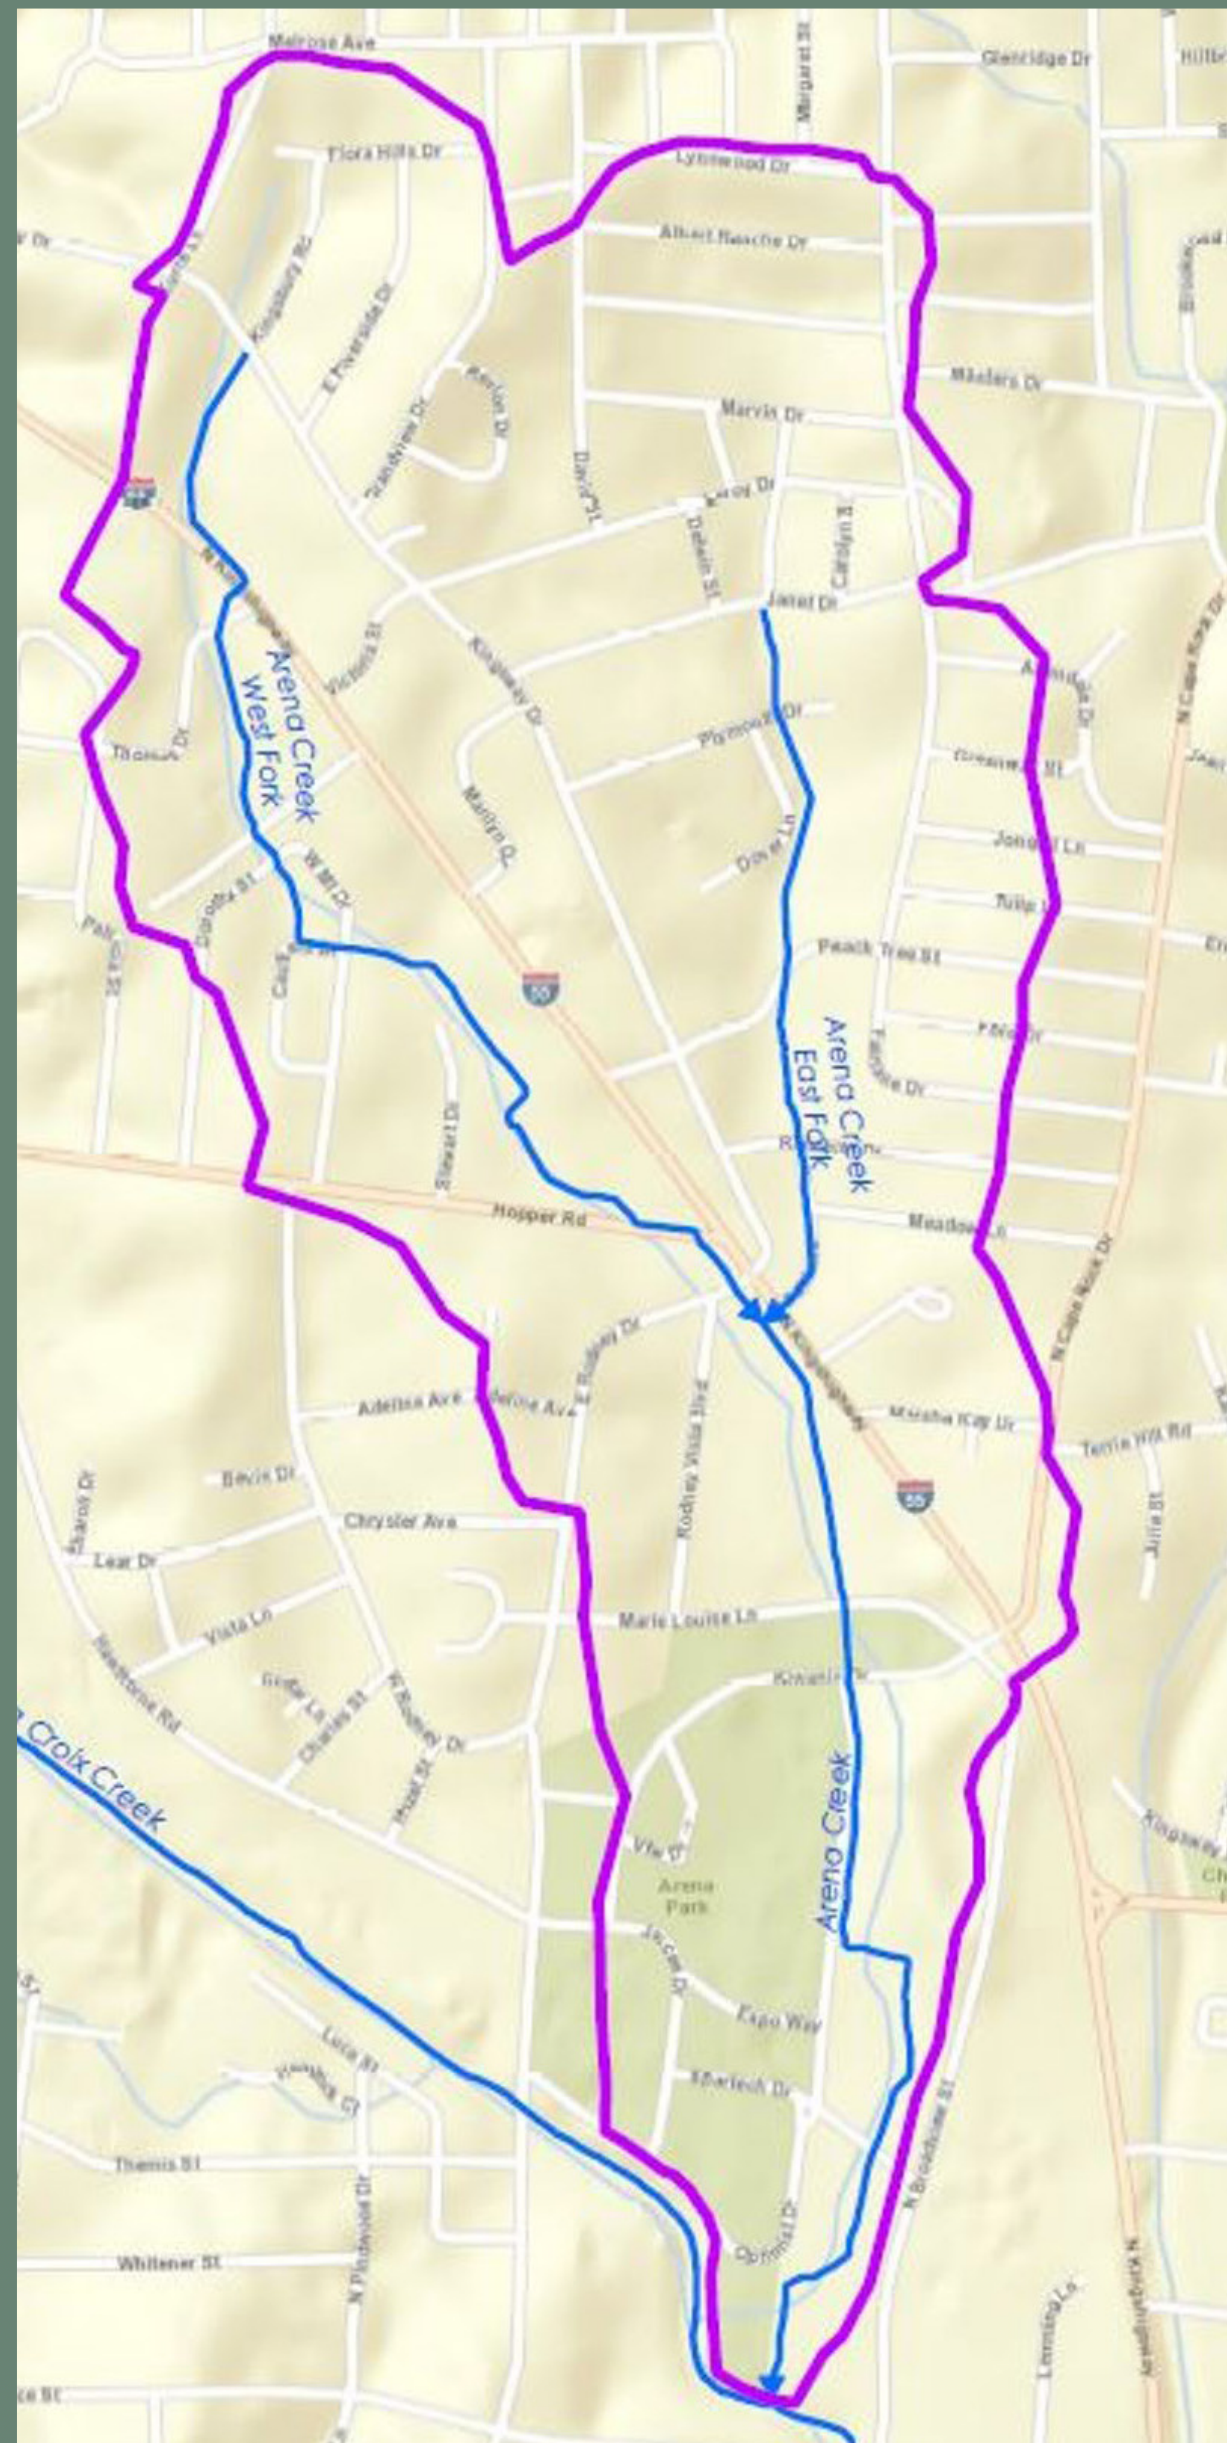

## CENTRAL KINGSHIGHWAY CORRIDOR

### ARENA PARK DRAINAGE IMPROVEMENTS

Arena Park is vulnerable to flooding from moderate to heavy rain events. This can negatively impact the activities and events using the park such as:

- SEMO District Fair
- Craft Beer Fest
- Cape First Demo Derby
- Great American 4th of July
- Cape Jaycee BBQ Fest
- Gus Macker Basketball Tournament
- Youth Baseball Tournaments/Leagues
- And more

The flood water also impedes access to the businesses and homes along Optimist Drive. The improvement will install a large box culvert to serve as an overflow for the creek along the east side of the Park along Optimist Drive. The new culvert will run from Optimist Drive through the southern portion of the park to Cape La Croix Creek. The estimated cost is \$2.55 million.

### ARENA CREEK WATERSHED

### ARENA CULVERT LOCATION

### HOPPER AT KINGSHIGHWAY CULVERT

Upgraded street crossings at:

- Hopper at Kingshighway (\$530,000)

The size of the culvert or box culvert will be increased to provide a higher capacity for stormwater runoff.
